

UTIC

Lisboa · Porto

1

The Society UTIC (União de Transportadores para Importação e Comércio, Lda.) has the head-office in Lisbon, Av. da Liberdade, 136-1.º, and the Factories located in Lisbon, Av. Infante D. Henrique, and in Oporto, Laborim, V. N. Gaia.

2

The whole of these plants, that covers a total building area of about 50,000 m² is mostly devoted to the production of coaches which are built by the monocoque system. The annual production output attains 450 vehicles, with which 90 per cent of the portuguese market is supplied, besides the export to England, Iran, Venezuela, etc..

3

At present, UTIC, with its capital and reserve funds summing up 248 million Escudos and with a total labour force of 2,350 people, is considered one of the ten major Companies of Portugal.

UTIC has capacity to increase its productive potential of coaches with a view to comply with the growing number of orders coming in from all markets on which it is being demanded with generalized interest.

4

Both its factories, in Lisbon and Oporto, are well equipped with modern and adequate machinery for a production of high class quality vehicles to meet demand and requirements of the world markets.

5

UTIC is receptive to building monoblok units according to the local regulations of the interested countries. These units are constructed from the components to the importer's special interest. The components enter the Custom bonded area of UTIC, free of duty, and after being converted into coaches are forwarded to the destination against final payment of the Custom duties in conformity with the regulations of the country concerned.

6

The structure of the coaches built by UTIC is totally metallic, designed on the most advanced engineering concept and is prepared for the installation of the engines at the rear, centre or front of the vehicle.

7

The UTIC Engineering Department is ready to provide every detailed information on this type of construction and will issue, on request, drawings made up from the customer's requirements.
