LC 936

KAROSA

The long-distance coach LC 936 is an innovated and modernised successor of the reliable model LC 736.

LC 936 is an 11,5 m long coach which, above all, is designated for regular as well as irregular long-distance passenger transportation. With its characteristics the vehicle also serves the purpose of longer trips abroad.

We directed our attention to the comfort of passengers, so that long trips will be as pleasant as possible.

The selected anatomically shaped seats with collapsible rests, individually adjustable ventilation openings lights ensure the feeling of safety and comfort. The primary version offers 49 seats, while for achieving greater comfort the capacity of the vehicle can be lowered by five seats.

MODERNITY
LC 936

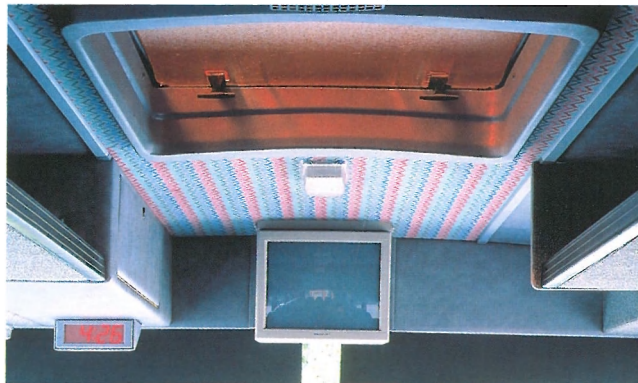

All glass is safety glass tinted to dim the sun's rays. Side glass is doubled and the glazing is finished using gluing technology. As a standard, the vehicle is equipped with environmentally friendly air-conditioning without harmful CFC's. In the winter season, the vehicle's staff and especially the passengers will appreciate the standard preheating and heating equipment, the function of which is independent of the running of the engine. Naturally, the deceleration retarder with anti-blocking and anti-skid systems ABS/ASR is standard safety equipment.

AMENITIES

LC 936

Passengers can enter the vehicle by one spacious single-wing door which opens outwards. The rear, as well as single-wing door, serves as an emergency exit. For passenger luggage are intended holds located between the front and rear axles of the undercarriage, with the total capacity of 5,3 m³.

RELIABILITY

LC 936

For tour use the LC 936 can be equipped with a refrigerator, coffee maker, video recorder and many other accessories which will undoubtedly make the trip more pleasant for your customers. Also the driver was taken into consideration during the designing of the vehicle.

Both the pneumatically spring-mounted driver's seat as well as the steering wheel are vertically and horizontally adjustable.

A single panoramic windshield provides an optimal view at all times, and the well arranged ergonomic layout of instruments and controls makes the handling of LC 936 pleasant and not very tiring.

By its utility value LC 936 gives a clear answer when the operator wants to offer his customers either luxurious regular long-distance transportation, or economically beneficial tourist-type means of transport.
