

# Travego RH

Welcome to business class

Mercedes-Benz

## Comfort from Monday to Sunday

The Travego RH is the touring bus for every day. Its forte is a high level of comfort, consistent economy, attractive design and reliable, state-of-the-art technology. One that understands your business.

Whether for a demanding cultural heritage tour, a weekend excursion, an evening visit to the theatre or for long-distance routes, the Travego RH is ideal for many requirements. It will soon become an essential part of your fleet. It will also be well received by your passengers. Its outstanding modern styling ensures an all-star reception in every venue. The elegant exterior corresponds completely with the interior which is intended

for passenger comfort. The standing height of 2.10 m even permits exceptionally tall people to stand upright. Apart from the driver and one hostess, there is space for 49 passengers in the 3-star version, of course with their luggage, since the Travego RH has a copious luggage compartment. Platforms and seats in way of the centre door can be removed. In this way, where required, you can easily set up a standing area.

**Comfortable from front to back**

In the Travego RH, your passengers travel on comfortable seats with grab handles and lap belts. Hooks for clothing and bags are integrated in the seat backs. At your request, the passenger seats can be made even more comfortable by means of adjustable seat backs, luggage nets and other extras. A high degree of comfort is also ensured by the service sets over the seats. They permit individual lighting, ventilation and adjustment of the sound system level at the passenger seats. So that your passengers feel well in the Travego RH whatever the weather, its standard equipment includes thermally insulating wrap around glazing as well as powerful convector heating and reliable ventilation. An air-conditioning unit is available as optional equipment. In addition, the fitment of a mini-galley or a toilet.

**A triple variety of features**  
Equip the Travego RH so that it complies with your demands and the application. That's really simple with the three equipment lines Function, Fashion and Flair.

**Function:** the classical line. It is characterized by a timeless, discreet design and is ideal for a combination of public service traffic, taking school children from A to B and for excursions.

**Fashion:** the fashionable alternative, that is particularly attractive for younger passengers. Ideal for event trips, snowboarding weekends or for visits to pop concerts.

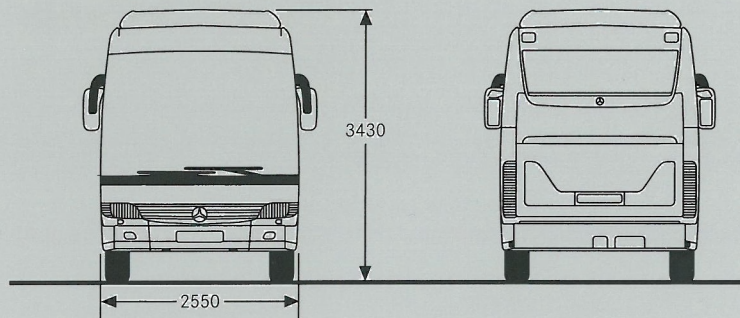

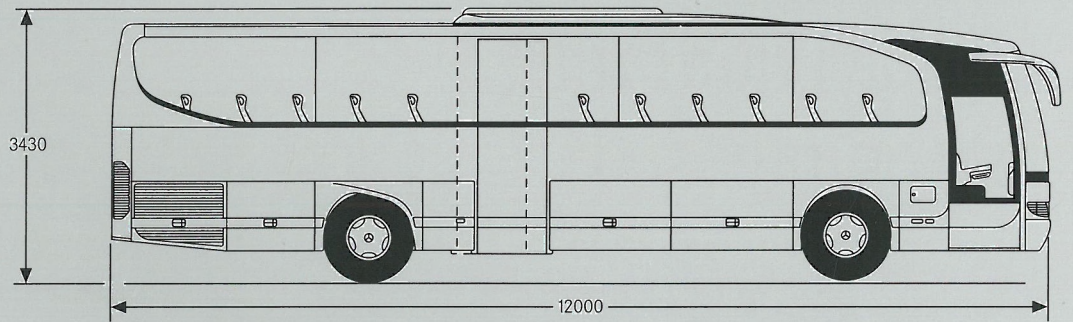

**Flair:** this is the variant for high-quality elegance. It satisfies upmarket demands where appearance and comfort are concerned. Flair is recommended especially for city tours or for cultural heritage tours.

Top:  
*Let's go: Three steps with anti-slip covering lead inside from the centre door.*

left:  
*Interior space: There is enough space in the luggage compartment for the luggage of your passengers.*

## Your accountant will be pleased

Low costs, higher performance - with the Travego RH you won't be taking any chances. That's because state-of-the-art technology ensures low life cycle costs and highest safety.

The Travego RH will win over the most cautious accountants due to its favourable purchase price and its comfortable standard layout. Long servicing intervals permit brief down-times. An additional blessing for your budget is the economic and sturdy 6-cylinder in-line engine OM 457 hLA with 260 kW (354 bhp) or on request with 300 kW (408 bhp). Naturally, both engines comply with the stringent Euro 3 standards. The transmission

is a mechanical MB 6-speed joystick circuit with pneumatic gearshift. It ensures a smooth, easy gear change.

The Travego RH is not only economic but also safe. The disc brakes on all four wheels comply with the highest standards. ABS and ASR are fitted as standard. In addition, the Travego RH is also equipped with an electro-pneumatic braking system (EBS) for even shorter stopping distances.

*Particularly practical for long-distance public service: the double-leaf outwards opening door. This is only one of the many possibilities from the extensive range of special accessories for the Travego RH.*

# The Travego RH in figures

<b>Model</b>	<b>15RH</b>
