

MAN Lion's Regio.

Here and there and everywhere. By coach.

MAN kann.

The greatest efficiency wherever you drive.

Added value on board.

Whoever moves more with less is ahead of the competition. Isn't it a pleasure to reach this goal so comfortably with the Lion's Regio? Its dynamic common-rail engines with dependable Euro 6 technology produce more power, use less fuel and care for the environment. The Lion's Regio intercity bus provides answers to the questions of our time. Enjoy its outstandingly efficient performance in medium-haul and feeder service as well as on weekend trips and long-haul journeys. A bus for every day of the week and journeys to any destination. A mobile prestige object that shows how elegant efficiency can be on two or three axles.

On tour from place to place.

Efficient over long distances.

A trip with the Lion's Regio is a great experience, wherever the destination might be. Because as far as dynamism and comfort are concerned, it always comes out tops. To ensure that comfort doesn't come too short on a long journey, the Lion's Regio can be fitted out for day trips and long-distance work with coach seating, galley and WC. Passenger capacity is yet another strong point: the Lion's Regio bus can carry up to 55 passengers while the Lion's Regio C seats up to 59 and the Lion's Regio L up to 63 passengers in comfort. Their luggage too is easily stowed – in the capacious underfloor luggage compartment with up to 7,7 m³ in the 2-axle Lion's Regio C.

Some of the equipment shown or described in this brochure is not included as standard.

At home in the city.

Efficient on every route.

The Lion's Regio is ready to go as an urban service bus. Wide non-slip entries, ergonomic handrails and indirect step lighting invite passengers to come aboard. The buses with double doors at the rear are prepared ex-works for installation of a wheel chair lift. The interchangeable platform is a highly versatile innovation: a simple procedure is all it takes to switch from seats front to back to a configuration with a full-width standing-only space in the middle of the bus. Hand luggage stows in the large overhead racks. The commodious space concept is one aspect of the design, economy is another. These buses are designed to make it easy for you to achieve your revenue targets.

Freedom of movement in its truest sense.

True greatness shows itself in small details.

Passengers enjoying the bright interior also have an excellent view of their surroundings through the low-waist tinted windows. The smoothly contoured, easy-care surfaces are colour-matched and attracti-

ve right from the very first glance. Seat comfort is of a high level. You have the choice of ergonomic coach-type seats or a range of service-bus seating configurations designed to withstand everyday wear

and tear and indirect light concept is unique in this category and makes for a fascinating feeling of space during the hours of darkness. When you step aboard, you'll see: the Lion's Regio is a true MAN bus in every detail.

An enjoyable trip is all about comfort on board.

On every journey, the Lion's Regio offers the convenience of overhead service sets with air vents and reading lights. Your passengers travel at pleasant temperatures in high summer and in the depths of winter. Perfect air quality in the passenger compartment is maintained at all times as the fully automatic system balances the flows of fresh air, recirculated air and conditioned mixing air. An added benefit for the driver: the cockpit has its own dedicated air-con system. The fine points too have been optimised in every detail. The spent air from the interior is drawn off into the luggage compartment. That keeps dust and humidity away from the luggage and pegs the temperature at a constant level.

The Lion's Regio leaves nothing to be desired.

- Large, tinted side windows
- Smooth, easily cleaned side windows and frames
- Electronic roof-mounted heater or airconditioning system organically incorporated into the roof structure
- Several 19" slots for IBIS components, no Euro-box necessary
- Full range of ergonomic seats, right up to coach-style seating
- Body versions with single-leaf or double-leaf second door
- Indirect lighting concept for an enjoyable feeling of space
- Roof ducts with large, open luggage racks, air-vent sets
- WC and galley modules
- Large-volume luggage compartment with 6.8 cubic metres capacity in the Lion's Regio L and 7.7 cubic metres in the Lion's Regio C
- Interchangeable platform system midway along the vehicle interior
- Skeleton structure prepared for installation of wheelchair lift at door No. 2
- Front-end cabinet or refrigerator

Turning work into pleasure.

Take a seat and feel good.

Professional drivers appreciate an ergonomically optimised workplace that makes their job easier and enables them to concentrate on their driving. If you want to extract even more enjoyment from your job, you'll enjoy the satisfaction of driving a Lion's Regio. Whether digital speedometer, fuel consumption indicator or MMC (Multimedia Coach) with navigation, whether climate control or central onboard computer – displays are clearly structured, controls logically arranged and within easy reach. With the buttons in the multifunction steering wheel it is possible to retrieve vehicle data and control a whole number of other functions. The driver has a grip on everything, but without taking their hands

from the wheel. Right in front of you is the ellipsoid dashboard with large, chrome-ringed analog instruments, attractively styled vents and, in the centre, the driver information display. You can use the menu of the driver information display to access on-board diagnosis at any time.

Being at ease behind the wheel means driving safely.

The driver's seat has a three-point seat belt and can be adjusted to suit any driver's preferences. IPS is an integrated lumbar and side-support system to ease the strain on the driver's back, so that he or she can stay alert behind the wheel. The driver's microphone is conveniently integrated into the backrest. Of course there are also neat arrangements for those everyday indispensables: the cupholder is conveniently placed, and there is a lockable compartment for valuables.

Last but not least, the cockpit can be sectioned off from the passenger compartment in ways that suit the various uses. The options range from half-height partitions through a full-height transparent rear panel to a full driver's cab (extended partition with hinged door). The area around the cockpit is air-conditioned, as is the front entry area. The powerful air conditioner ensures excellent driving comfort.

Why drivers love the Lion's Regio.

- Ergonomic cockpit with conveniently positioned controls
- Chrome-finished instrument panel with easy-to-read instruments
- Driver information display for on-board diagnosis
- Choice of convenient stowage compartments and oddments trays for the driver's use
- Overhead heater, electronically controlled, or air-conditioner and convection heaters in passenger compartment
- Multifunction steering wheel, continuously adjustable in height and angle
- MMC (Multimedia Coach) with navigation function
- Air-conditioning for cockpit can be controlled independently of the passenger-compartment system
- Electrically operated roller sunblinds for windscreen and driver's side window

Life is full of surprises. But no unpleasant ones on a bus trip.

Advanced emergency braking system (AEBS)

The advanced emergency braking system (AEBS) function informs the driver of impending collisions and brakes automatically in emergency situations, if necessary until the vehicle comes to a stop.

Lane Guard System (LGS)

The Lane Guard System (LGS; lane detection) uses a vibrator impulse in the seat to warn the driver as soon as the bus leaves the lane, i.e. the driver diverges from the lane markings.

Adaptive Cruise Control (ACC)

Speed is controlled based on the distance from the vehicle in front and kept constant by means of subtle interventions from the retarder in the brake system. Safety on the road is also increased.

Electronic stability program ESP.

ESP is standard on all Lion's coaches, and it's there to help in critical situations. If it detects a hazardous situation the system stabilises the vehicle by braking individual wheels selectively, and if necessary by cutting back engine torque.

Electronic braking system EBS.

EBS ensure that the brakes are applied rapidly and it interacts with the anti-lock braking system to achieve a significant increase in braking safety. The integrated traction control system prevents spin at the driven wheels. Electronic adaptation of braking force to any given braking

situation also helps minimise wear and tear on the system components and improve the cost effectiveness of the brake system over its entire useful life.

MAN Brakematic with Bremsomat brake control and cruise control.

MAN BrakeMatic management of the sustained-action brake means that this brake is automatically applied as soon as the driver touches the brake pedal. Bremsomat brake control and cruise control enable the vehicle to hold exactly at a preselected speed, boosting safety on steep downhill gradients in particular.

MAN TipMatic®.

The 12-speed MAN TipMatic transmission can be operated both in fully automatic mode and manually by means of the touch-action stalk on the steering column. If the retarder takes effect, the transmission automatically selects the gear that maximises braking efficiency.

Xenon headlights.

The xenon lights including headlight washer system significantly improves illumination of the road ahead and enhances safety, particularly in bad weather and when visibility is poor. These lights are more than twice as bright as conventional halogen bulbs.

You can do a great deal for the environment.
Drive a Lion's Regio, for example.

A clean lead.

MAN relies on a combination of exhaust gas recirculation (EGR) and selective catalytic reduction (SCR) to achieve the required reduction in harmful emissions. This results in a considerable reduction in fuel consumption, thus benefiting both the environment and the economy.*

The drive to greater efficiency.

Torquey 6-cylinder D20 common-rail engines with 10.5 l displacement get the opportunity to flex their muscles in these vehicles. The choice ranges from an entry-level 235 kW (320 hp) 265 kW (360 hp). Engines tuned for longdistance touring and for challenging route topographies. And all that MAN power is delivered to the road through a 6-speed gearbox or the twelve-stage MAN TipMatic®. The range also includes two automatic transmissions (4-speed and 6-speed) engines.

* In some non-European countries, engines in Euro 4, Euro 5 or EEV standard are permitted.

MAN services. Your bus in the best hands.

Maximum quality for your vehicles' maximum service life – that's our promise to you. With a wide-ranging portfolio of services, we offer 360° support that is both efficient and reliable. You can rest assured at all times, then, that your MAN bus is in the best hands with us.

MAN Solutions and MAN Service provide all the relevant services, meaning that your MAN buses are always operated in the best possible conditions and that you'll be able to profit from your vehicles for even longer. Whether it be MAN service contracts or MAN Mobile24, your mobility is our concern. That is true of our additional services too. MAN Solutions, for instance, has tailored solutions on hand to optimise operating your vehicles, increase profitability and increase efficiency. MAN ProfiDrive® schooling for drivers and further training modules bring your drivers up to speed, making day-to-day driving safe. MAN Financial Services will help you to stay financially mobile. Moreover, our bus rental service makes it possible to respond more flexibly to shortages or increased need. Whatever service you choose, you're always on the right road with MAN.
