

King-Kong Series

Single Windshield Large-Size Intercity Bus

Asiastar Profile

As the trailblazer of the coach-making industry of China and practitioner of “China’s coach dream”, Asiastar owns a history of more than half a century in Chinese automobile industry and has broken numerous records in Chinese coach industry: the first professional coach of China JT663, the first sleeper coach of China JT6970, the first rear-mounted chassis coach of China JS6970H, the best seller record holder of China new energy-efficient JS6126GHEV, the best of the year coach YBL6125H, and the first luxury bus reaching EPA2017 emission standard and exported to the United States…

With investment from Weichai Group, Asiastar has undergone another reform of important historical significance, and has fully improved its overall competitiveness by making full use of Weichai’s advantages in respect of technological research and development, market development at home and aboard and service network, and intensifying strategic collabo- ration with Weichai.

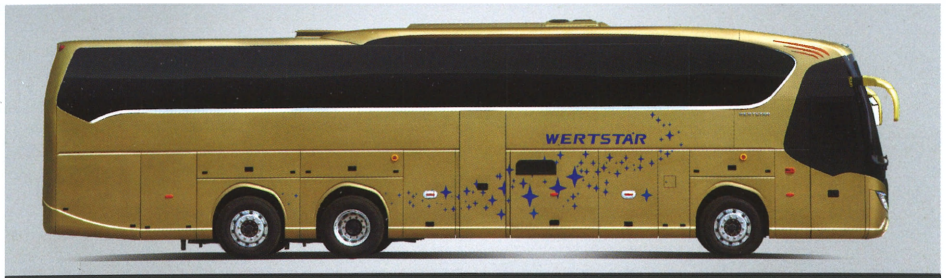

Asiastar currently has two production bases, namely, Yangzhou Base and Xiamen Base. Xiamen Base covers a land area of 100,000 square meters in total, mainly produces high-tech new-energy hybrid power bus, pure electric bus and Euro low-emission luxury bus, and has products exported to Europe, the United States, Austria and other developed countries. Yangzhou Base is expanded and put into operation in August 2013 with acapacity of nearly 30,000 vehicles, and has the first-class bus production lines and product R&D laboratories in China.

The products of Asiastar have passed such quality certification as IATF16949, 3C,ADR, DOT and CEC, and has been accepted into the Vendor Roster of the United Nations.

Asiastar Bus has multiple brands of “Asiastar”, “FTBCI” and “Yangtze”, and products including 5-18m intercity buses, school buses, high-end tour buses, urban buses, private coaches, luxury limos, special vehicles and other environment-friendly and energy-saving buses. Buses of all types have been not only well received in China, but also exported to North America, Austria, Eastern Europe, Southeast Asia, Russia, the Middle East, and Africa, etc. Besides, Asiastar has set up more than 500 distribution and after-sale service outlets at home and aboard in order to provide one-stop network services for users.

As the practitioner of “China’s coach dream”, Asiastar undertakes the duty to establish a sound image for China’s coach, innovates the “Star Standard” (Star Powertrain, Star Design, Star Craftsmanship and Star Wisdom) for coach, and invests heavily in high-end coach of Werstar series. Asiastar is spreading and expanding its business all over the world, but not merely in Europe.

Looking into the future, Asiastar will achieve its development objectives, and great development blueprint to make contributions to the society, create value for customers and enable its employees to realize the values by regarding “creating ten-billion Asiastar, becoming an expert in providing safe and comfortable transportation service for the public in the world, making Chinese benchmark products and producing the best coach in China” as its strategic goals; take “providing first-class public traffic facilities to the world!” as its mission; take “providing customers with satisfactory passenger transportation solutions and becoming the internationally famous bus manufacturer with global vision” as its vision; and take “ market orientation and satisfaction of customer’s demands” as its tenet.
